

Thank you for choosing Racks Point. Follow these four steps to assemble your shelving unit.

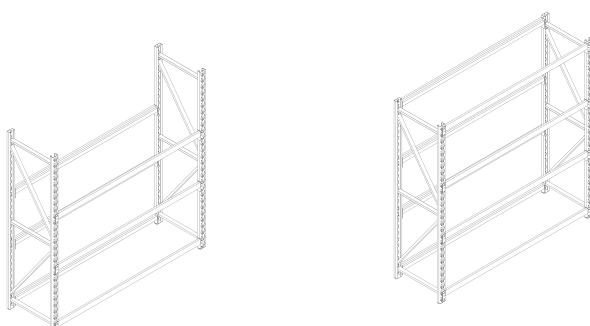

- 1** Stand up one upright frame and insert two beams into the butterfly holes at the bottom, both at the same height.

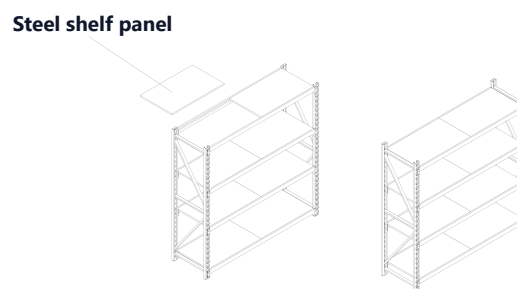

- 2** Stand up the other upright frame and insert the beams as in step 1.

- 3** Insert the remaining beams in the same way.

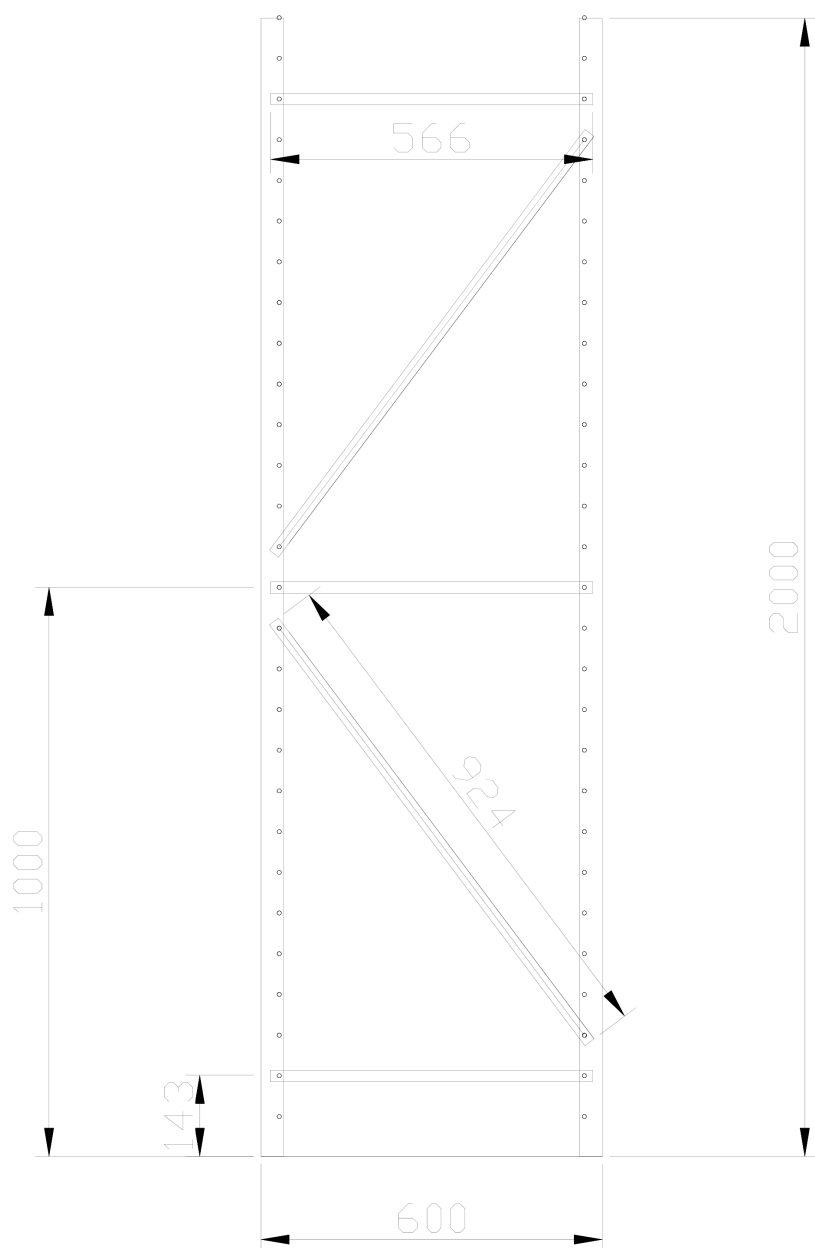

- 4** Place the steel shelf panels on the beams one by one until all levels are complete.

The upright frame

The upright frame is supplied unassembled and is bolted together: join the two uprights with the horizontal braces and the two diagonals as shown in the drawing. Dimensions in millimetres.

Any questions during assembly?

We're happy to help.
